Wear and Acceptability Test

- Mission:

  - To simultaneously and systematically conduct a multiple phase uniform wear test of four new uniform program concepts, utilizing over 2500 active duty participants (males, females, officers and enlisted), located at potentially 50 sites around the world

  - To collect, evaluate and document the performance of wear test components by participants and the opinions regarding wear test components by observers

- Objective:

  - Evaluate the overall compatibility of new uniform concepts (designs & modifications) within all naval communities and environments to ascertain the user
